JavaScript
HTML & CSS

CAREER OBJECTIVE

I'm a Frontend Developer with 3 years of development experience and technical project management experience. My experience in all sides of the development process allows me to create products and features that focus on helping people. My biggest strength is my ability to approach technology with empathy for the humans that will be using it. I am open to in-office, hybrid, or remote opportunities and I thrive in environments where teamwork and collaboration are valued.

Frontend Developer

Rooster Grin Media

📅 February 2024 - Current

- Developed and launched websites in under a week, ensuring optimal performance, mobile responsiveness, and alignment with client specifications.
- Ensured ADA compliance across all websites follow industry standards.
- Maximize SEO scores by optimizing on-page elements such as metadata, page load speeds, and structured data, improving visibility on search engines.
- Collaborated with designers and developers to enhance in-house website templates, improving reusability, scalability, and efficiency across projects.
- Delivered engaging website presentations to clients, walking them through design and functionality, and gathering feedback for continuous improvement.
- Mentored junior developers, providing guidance on best practices, code optimization, and debugging techniques to enhance team productivity and knowledge-sharing.

Technical Project Manager

Rooster Grin Media

📅 January 2023 - February 2024

- Led a cross-functional team of 2 designers and 6 developers, directly reporting to the CEO and driving project success.
- Improved engineering processes and project management systems, increasing site launches to 25 per quarter.
- Coordinated the successful execution of 40+ simultaneous client projects, ensuring timely site launches and customer satisfaction.

Support Developer

Rooster Grin Media

📅 September 2021 - January 2023

- Managed an average of 110 monthly support tickets, including content updates, landing page creation, refactoring code, and troubleshooting client issues.
- Demonstrated flexibility and fast learning in adapting to new code bases, technologies, and third-party integrations.
- Applied technologies such as Vue, Nuxt, PHP, Sass, as well as working with cloud platforms like S3 and AWS.
