

PROFESSIONAL EXPERIENCE

COLLECTIVE. LLC – WEB DEVELOPER | JUNE 2025 – CURRENT

- Built a responsive WordPress site using Elementor Pro optimized for accessibility, performance, and mobile experience.
- Built a fully responsive website template for a client with prebuilt pages and features to allow them to build their own site. Responsibilities included developing the design and the system of component architecture.
- Updated weekly lessons for a federal educational program, customizing design based off content and making design changes for responsiveness.

ROOSTER GRIN MEDIA – STAFF FRONTEND DEVELOPER | FEB 2024 – FEB 2025

- Built and maintained SPA and static websites with WCAG-aligned coding practices, consistently achieving 95–100 Lighthouse accessibility scores.
- Identified and fixed ADA issues across templates and custom builds, including color contrast, heading structure, focus states, ARIA labels, and semantic markup.
- Collaborated with designers to resolve accessibility conflicts in client-provided color palettes and layouts.
- Conducted manual testing across Chrome/Firefox/Safari, validating responsive behavior and cross-browser consistency.
- Provided accessibility guidance to internal designers and junior developers; reviewed their work for issues prior to deployment.
- Supported GitHub-based team workflows and AWS CI/CD deployments.

ROOSTER GRIN MEDIA – TECHNICAL PROJECT MANAGER | JAN 2023 – FEB 2024

- Oversaw 40+ concurrent web development projects, reviewing designs and builds for accessibility risks during each stage.
- Communicated WCAG/ADA concepts to non-technical clients and content creators, clearly explaining design impacts, required corrections, and the reasoning behind them.
- Led design reviews where color contrast, component semantics, and navigation structure needed adjustments to meet accessibility expectations.
- Facilitated cross-functional collaboration between designers, developers, and stakeholders to ensure accessible, WCAG-conscious implementations.

ROOSTER GRIN MEDIA – SUPPORT DEVELOPER | SEPT 2021 – JAN 2023

- Built marketing landing pages for sites to maximize SEO rankings while a full site is in development.
- Handled ~10 daily frontend update tickets, frequently resolving accessibility issues on existing client sites (color adjustments, structural HTML fixes, alt text remediation, link semantics, etc.).
- Regularly used Lighthouse and WAVE to review ADA compliance and update components accordingly.
- Debugged cross-browser compatibility issues, including typography, layout, and interactive components.
- Contributed to internal documentation and accessibility-aligned coding patterns for future builds.
